Vaccin COVID-19
SE VACCINER, SE PROTÉGER

To be protected from Covid: the vaccines in France
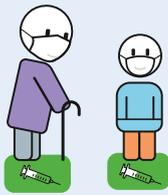

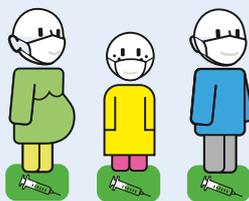

In France, the vaccine is recommended from 5 years old. It is not obligatory. **To be well-protected**, normally you need **2 doses and a booster injection.**

Certain foreign vaccinations are **recognised** in France.
Others need 1 or 2 extra doses. A booster will be necessary in most cases after several months.

For a primo-vaccination to be recognised in France:

I have received a vaccine	I have a primo-vaccination*	To have a primo-vaccination recognised in France
Pfizer, Moderna, AstraZeneca, Janssen, Novavax *or* Covishield, R-Covi, Fiocruz	Complete ✔	No extra dose needed
	Incomplete ☐	Have 1 vaccine dose
Covaxin, Sinopharm, Sinovac	Complete ✔	Have 1 vaccine dose
	Incomplete ☐	Have 2 vaccine doses
Sputnik and others	Complete ✔	Have 2 vaccine doses interval of between 21 and 49 days
	Incomplete ☐	Have 2 vaccine doses interval of between 21 and 49 days

* Completed primo-vaccination : normally 2 doses or 1 dose if you have already had Covid

Traduit en anglais

The vaccine or a negative test is obligatory for:

- Certain healthcare jobs (up-to-date Covid vaccination).

- To go into a hospital (up-to-date Covid vaccination or negative Covid test).

To protect vulnerable people

HOSPITAL

How to get vaccinated?

The vaccine is free. You can be vaccinated without a social security card or state medical aid (Aide médicale d'Etat AME).

A postal address, even a temporary one, may be requested.
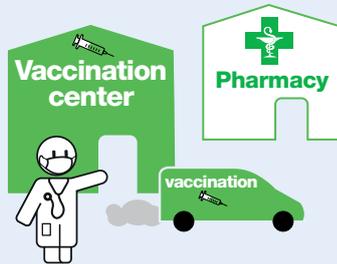

The vaccination is done in a vaccination center, in a chemist, by a health professional or with some non-statutory organisations.
